

PLEASE HELP FIND SOURCES OF POLLUTION IN THE RIVER'S SHUTTLE AND CRAY BY JOINING AN OUTFALL SAFARI

Pollution can find its way into urban rivers via surface water outfalls (drains) as a result of misconnected plumbing. We are looking for volunteers to help conduct Outfall Safari surveys in the River's Shuttle and Cray. This involves bankside surveys of stretches of the river to map and record the impact of outfalls.

The surveys will take place during:

March—April 2023

As a volunteer, you can choose which stretch of the river and at what time to conduct the survey, within the survey period. The survey will be conducted from the riverside path, in areas that are accessible and where the river is easily visible. Training will be provided by ZSL.

The training session will take place at:

**175 Town Hall Square, Crayford, Kent, DA1 4FN,
on Wednesday 15th March at 10:30-12:30.**

Register at: <https://ShuttleandCray.eventbrite.co.uk>

For more information please email: sam.facey@zsl.org

Once registered, more information will be sent to you about how to join the training.
